

Section 10: Data by Facility

In preparing the 2005 health, safety and environment data for our global operations we have taken into account that materials produced by one Inco operation are often the raw materials for another Inco operation. Numbers for our global operations have been adjusted to prevent double counting of production and of data for aspects of HSE performance. Hence the reader is cautioned that adding the numbers contained in this section may not produce the same figures as are reported for our global operations.

HSE data are provided for five years and socio-economic data are provided for the past three years only. Socio-economic data were not consistently collected across the company prior to the publication of Inco's first Social Responsibility Report in 2003. As a result, reliable data are reported only for 2005, 2004 and 2003.

Notes

NR = not reported
NS = not significant
NA = not applicable

Numbers have been rounded.

The data for each facility represent the sum of all of the operating facilities/sites operating at each geographic location and/or under management of each operating unit.

Inco Metals (Dalian) Co., Ltd., a small operation, is not included. Inco Advanced Technology Materials (Dalian) Co., Ltd. is included in this section.

Figures for waste generated and disposed of off-site are not comparable between facilities as local definitions and regulations vary. Hence, data for waste are not reported pending development of a consistent methodology for reporting waste at all Inco facilities.

The following errors in reporting of previous years' data, discovered during a thorough internal data review, have been restated:

Overburden, tailing and slag for Sudbury 2000 to 2002

Carbon Dioxide Emissions for Inco TNC Limited for 2004

Particulates emissions to air. See text on page 46 of this Report.

*Voisey's Bay Nickel Company Limited became operational in late 2005.

**In 2005, a total of 2,400 people were employed in all facets of the Voisey's Bay project. The figure of 252 is based on the number of direct, full-time employees of Voisey's Bay Nickel Company Limited as at December 31, 2005 and does not include contractors, which represent some 50 per cent of the workforce at the mine and concentrator site, and other Inco employees working in Newfoundland and Labrador.
